

Faxination Cloud Fax

Send and receive faxes directly via the cloud with applications such as Microsoft Office 365

Cloud fax service

Looking to modernize and upgrade your fax capabilities without having to invest in expensive software and server maintenance? Faxination Cloud Fax, a software as a service, requires no additional hardware or software, making implementation effortless. No longer are businesses limited by the inefficiency of aging on premise fax solutions and telephony infrastructures. Nor are businesses limited to faxing only a PDF file format. With Faxination Cloud Fax users can send and receive faxes of any document type anytime and anywhere.

Integrated solution

Unlike other cloud fax services, Faxination Cloud Fax is integrated into your current systems and business applications such as Microsoft Office 365, and therefore easy to use. Minimize the impact on everyday business with a migration to the cloud by porting or routing your current fax numbers dependent on your needs. Faxination Cloud Fax is available with unlimited scalability.

Reliable & Secure

Being the fax solution of choice for corporates, enterprises and multi-national companies, Faxination offers the reliability and security that customers have come to trust for more than 25 years. Integrated monitoring and control options offer different access levels removing business vulnerability as well as boosting security and facilitating compliancy.
