fenestrae®sdx

A **reliable, secure**
cloud based
fax solution

Fenestrae SDX offers intelligent data capture and digitization of paper documents, fax, and email attachments. Integrate business data into existing systems, workflows, and processes with a highly optimized platform. Modular in design, components can be mixed and matched to meet any deployment requirements all with secure end to end processing, logging, and management options for regulatory compliance.

FENESTRAE SDX CLOUD SERVICE OFFERS SEVERAL ADVANTAGES, INCLUDING:

Enterprise Technology	Fenestrae SDX comes with all the benefits of our well known and loved Faxination on premise and more.
Scalability	Companies can modify their number of fax numbers with a simple request to Fenestrae, without disrupting their cloud faxing service. This contrasts with the extensive planning and investment of upgrading an on-premise fax service. Deployment is also seamless.
Compliance	Transferring the responsibility of your servers to Fenestrae allows your company to ensure faxes comply with leading regulations, supported by Microsoft 365 compliance options.
Price	Paying a fee based on usage and capacity for a secure; scalable and compliant cloud faxing service, for many companies, is considered an advantage.
Hardware and Software Requirementsce	No hardware, rackspace, or software maintenance contracts, making your solution location independent.

fenestrae®sdx

Technical Resources

The requirement of minimal company resources is another contrasting advantage of using Fenestrae SDX cloud. By entrusting Fenestrae specialists to manage and maintain your servers, and receiving 24/7 support for any issues, your IT department can focus on other tasks.

Service Level Agreement

Providing high availability is a significant benefit of Fenestrae SDX. The Fenestrae SDX Service Level Agreements (SLAs) include a 99.9 percent uptime assurance, as well as geographic redundancy to ensure that downtimes are minimized. This level of redundancy is often difficult for SMBs to achieve.

Tools

Incorporating tools into on-premise faxing services requires time, resources, and skill. Choosing Fenestrae SDX provides your company access to a range of tools that expedite these processes. Examples of features include SMPT; MFP support; email to fax; API options; web fax and more.

Ease of Management

Your company/cloud site will have their own management portal to manage and control their fax numbers and users.

Integrations

Fenestrae SDX support various methods for integrations with your current infrastructure, as connectivity to your local PBX; SIP-connections; user management, and number management, so you can stay in control and with minimum need for changing your current infrastructure.

Security

Fenestrae SDX support best methods for security and encryption for data in transit and in storage, we are experienced with handling Personal Health Information, Credit Cards Data and Secret Recipes.

Easy to use

Fenestrae SDX has been designed for the user experience to be quick and easy.

Simple Deployment

Deployment can be achieved within a day or two at most.

Trial

Fenestrae SDX has a trial which can be activated easily for you to test.
